

Akash Singh

Indore, M.P. — +91-9340041985 — akashsinghp10@gmail.com — LinkedIn — GitHub

Summary

Full Stack Developer with 2+ years of experience building scalable, AI-integrated web applications using React.js, Next.js, Node.js, Express.js, and cloud infrastructure. Strong expertise in REST APIs, microservices, AI-powered features, responsive UI design, authentication, CI/CD automation, testing, and performance optimization. Proven ability to collaborate across frontend, backend, and AI teams delivering high-quality solutions.

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind.

Backend: Node.js, Express.js, Strapi.

Database: MongoDB, MySQL.

Tools & Languages: Linux, Git, GitHub, PuTTY, Vim, AWS, Docker, Azure, Jira, Slack, Growi, Sentry.

Work Experience

Software Engineer

Oct 2025 – Present

BestPeers infosystem, Indore, Madhya Pradesh

- Designed, developed, and deployed full-stack web applications using the MERN stack (MongoDB, Express, React, Node.js), ensuring responsive design, seamless user experience, and optimal performance across devices and browsers.
- Collaborated with clients and remote cross-functional teams to gather requirements, define project scope, and implement scalable solutions, consistently delivering projects on time and exceeding client expectations.
- Built and maintained RESTful APIs for complex data interactions, integrating third-party services, optimizing backend performance, and ensuring secure data management.
- Conducted code reviews, testing, and debugging to maintain high-quality code standards and ensure application stability and reliability.

Assistant System Engineer

Aug 2024 – Sept 2025

Tata Consultancy Services, Mumbai, Maharashtra

- Built and maintained responsive React.js web applications, improving UI performance and reducing defects.
- Understanding state management using React Hooks (`useState`, `useEffect`) for dynamic user interactions.
- Actively contributing to the codebase by adding new features, restructuring existing code and creating automation scripts that improved deployment speed by 15%.
- Recognizing for outstanding team collaboration and leadership, awarded Certificate of Appreciation and 2 Team Management Awards.

Projects

Simhealth – Health Care B2B

Live Demo

Tech Used: HTML, CSS, Tailwind, Bootstrap, ReactJS, Node.js, Express.js.

- Worked as a fullstack developer to create a flexible and responsive UI.
- Integrated Tavus AI using REST APIs, webhooks, and Azure services for enhanced medical user interactions.
- Microservice architecture with circuit breakers and message brokers.
- Deployed applications using AWS and Docker for scalable infrastructure

MoonLight – E-Commerce Website

Live Demo — GitHub

Tech Used: Mongodb.js, React.js, Tailwind, Node.js, Express.js, docker.

- Designed and developed a full-stack e-commerce platform using MongoDB, Express.js, React.js, and Node.js with responsive UI and seamless user experience.
- Applied role-based admin panel for managing products, categories, users, and orders.
- Built dynamic product catalog with advanced search, filtering, and sorting for optimized user navigation, integrated JWT authentication and authorization for secure login, signup, and protected routes.

Education

B.Tech

Samrat Ashok Technological Institute, Vidisha, MP

2024

CGPA: 8.34/10
